

# BILSTEIN®

## MDS Series

### BILSTEIN MDS Series.

#### The ultimate in high performance.

Developed and fine-tuned around the demanding curves of the Nürburgring-Nordschleife, the MDS Series provides precise damping adjustability for the premium advantage in road racing. The MDS features an inline independent adjustment system that allows the individual tuning of rebound and compression through the manual adjusters ranging from 1 (soft) to 10 (firm). Offering up to 100 different damping configurations, as well as both 36mm and 46mm monotube designs, the modular construction provides a versatile, championship winning formula in adjustability.

#### Features & benefits:

- 2-way independent rebound and compression adjustment system
- Aluminum adjusters scaling from 1 (soft) to 10 (firm) allow 100 damping variations
- In-line damping adjustment requires no external reservoir
- Easy Clip System (ECS) spring retainer maintains position in zero preload spring applications and allows rapid changes
- Bump stop cap protects threaded body
- Precision machine tolerances minimize friction
- Ultra low friction rod guide with redundant seal pack provides durability in harsh environments
- Available in 36mm and 46mm variants
- Ultra-low hysteresis results in maximum grip and tire life

BILSTEIN-TECHNOLOGY tested on  
NÜRBURGRING-NORDSCHLEIFE
