

BILSTEIN SteerTec®

Rack-and-pinion steering gear

Trendsetting

In modern automotive engineering, the steering system has taken on an ever greater importance. For this reason, you can rely on the quality, experience and competence of ThyssenKrupp Presta SteerTec, one of the world's leading manufacturers of hydraulic and electronically controlled steering systems.

Product advantages at a glance:

- Hydraulically supported rack-and-pinion steering gear for passenger cars and vans
- For front-axle loads of up to 30 kN (vans)
- Meets the highest standards of safety and driving comfort
- Optimal transmission of the steering forces
- Variable steering ratio to reduce the steering effort and improve vehicle handling
- Exclusively newly manufactured steering gears in accordance with OEM specifications
- Careful inspection in accordance with stringent OEM quality requirements

BILSTEIN SteerTec® rack-and-pinion steering gears (ZS 045/048/050/054, LZS 1/2/3) are available for these cars:
