# SUSPENSION SOLUTIONS FOR ARMORED/SPECIALTY VEHICLES

Toyota Land Cruiser 200 - Series System

The resources of ThyssenKrupp and Bilstein offer unparalleled engineering for severe armored vehicle suspension requirements for **every armor level from 1-7**. We can supply ride control units - or complete armored suspension systems.

## There is no substitute for experience

Our systems have been tested and proven to survive the toughest elements and circumstances in every corner of the world, from the hottest desert environment to freezing Arctic temperatures. Our clients include governments, individuals, National and State Defense Forces and leading NGO's from every continent.

Thanks to our significant involvement with almost every major car manufacturer over the years, we have built up a comprehensive database profiling everything from showroom models to one-off prototypes. With this accumulated knowledge at our disposal, the solution to your particular requirement or problem is often similar to something we may have encountered before.

## Applications for the Leading Armored Platforms
