

BILSTEIN®

XVA SERIES

Born from a proud heritage of race-winning technology, the all-new BILSTEIN XVA Series is setting the new standard for versatility and performance. Each XVA Series features a large Dual Zone nitrogen bulb and threaded aluminum body construction to provide a lightweight, compact package with greater nitrogen capacity and increased cooling characteristics. The series includes applications in the most popular stroke lengths and includes designs for the optional ACV base valve assembly. Upgrade to a single or double adjustable shaft assembly and untap the full potential!

Features & Benefits

- > Dual Zone gas bulb results in decreased gas pressure ramp up while increasing grip levels
- > Optimized floating piston offers improved driver feel and response
- > 46mm extruded aluminum threaded body improves durability and heat dissipation
- > Floating rod guide for decreased side load friction
- > Racer rebuildable
- > Included integral bump stop cap/spring wear sleeve
- > Optional ACV base valve allows for ultra low rod pressure
- > Maximum stroke in a non-remote reservoir configuration
- > Standard non-adjustable shaft with optional upgrades to single and double adjustable assemblies

Optional ACV base valve Assembly

Available with non-, single-, or double-adjustable shaft
